### Email Compliance via a simple network appliance... What Could Be Easier?

We live in a fast paced world of electronic communication. Email and Instant Messaging are growing at an unprecedented rate. Everything from passing on a note to legal documents are shared through these mediums. The proliferation of data in our lives has caused the requirement of institutions and organization to store, search and retrieve emails and other messages for legal and other important purposes.

Current changes in federal compliance guidelines now require organizations to provide quick and secure storage and retrieval of electronic data communication history.

Through utilizing email journaling or SMTP push technology, DataCove can archive email for virtually any type of network. DataCove archives email for the following email systems: Microsoft Exchange, Lotus Notes, Novell Groupwise, Standard POP 3 / IMAP and SMTP.

### Introducing DataCove 8000L

Enterprise Class Networks are demanding in all aspects of operations. Any appliance that is incorporated into your finely tuned data processing environment must be up to the task.

DataCove 8000L is up to the task!

Based on the Intel McKay Creek Chassis, DataCove 8000 has the reliability, processing power, data integrity and ongoing support that is critical for large scale compliance and archiving applications.

Allows your organization to be compliant with regulatory laws recently passed in the United States.

Simple, affordable, plug-and-play server appliance that can be installed anywhere in your network. Enterprise class hardware.

Long-term archival of all Email and IM data. Easily upgradeable with the 8000X to handle tens of thousands of email users.

Fully searchable database with intuitive web-based menus for easy use.

All models are fully ROHS compliant for sale in the the EU and UK.

***"We tried several other archiving solutions in our data center without success.***

***DataCove is the ONLY solution that worked properly with our mail systems.***

***It was extremely easy to setup and has been very reliable with archiving and retrieving our data."***

### How DataCove 8000L Helps Your Organization

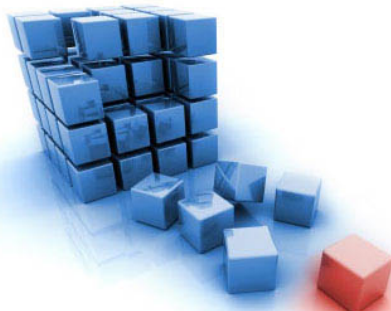

DataCove provides a simple solution to long-term email and IM compliance requirements. Using advanced retrieval and storage technology, DataCove provides:

- An easy way to store and retrieve email
- Advanced search for easy and direct access to data

### Technical Specifications

DataCove 8000L is based on the Intel McKay Creek Chassis and Storage Systems. All 8000L models include a tape library system which can be upgraded to longer term storage.

#### DC8000L MAIN SERVER

<b>Chassis:</b>	Intel McKay Creek
<b>HD Bays:</b>	12
<b>Processor:</b>	Intel Quad Core Xeon (2)
<b>Memory:</b>	16 GB ECC
<b>HD OS/DB:</b>	1.2 TB SAS RAID 5
<b>EMAIL DATA:</b>	7 TB SATA RAID 6
<b>OS:</b>	DataCove 4.0
<b>REMOTE:</b>	Intel Remote Module

#### PERMANENT MEDIA STORAGE - INCLUDED

<b>Chassis:</b>	Sony AIT 16 Library System
<b>Tape Format:</b>	AIT-5
<b>Tape Slots:</b>	16
<b>Total Storage:</b>	19.2 TB

#### MEDIA STORAGE - OPTIONAL UPGRADE

<b>Chassis:</b>	DataCove AIT 30 Library System
<b>Tape Format:</b>	AIT-5
<b>Tape Slots:</b>	30
<b>Total Storage:</b>	36 TB

Highly recommended for all configurations that include at least one DC8000X extended server.
